

Navigating Complexities of Global Trade Management

Best-in-class companies align GTM with business objectives and challenge the concept of global trade management as simply “a cost of doing business.”

Increased digitization enables 4 key values:

- cost savings
- agility
- reduced risk
- visibility

Cost Savings

Customer demand for lower delivered cost is a top obstacle facing **53%** of supply chain executives surveyed.

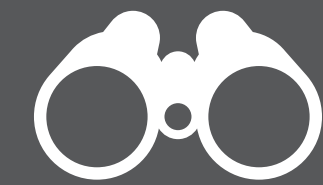

Agility

55% of supply chain executives pinpoint customer demand for faster response times as very or extremely challenging.

Reduced Risk

Global politics and weather disruptions — plus layers of suppliers and regulations — require the ability to monitor and assess risk at a deeper level than ever before.

Visibility

Digitizing global trade management enables visibility far surpassing traditional outsourcing.

Digital Supply Chain Value Quantified

Reduce procurement costs by **20%**

Reduce supply chain process costs by **50%**

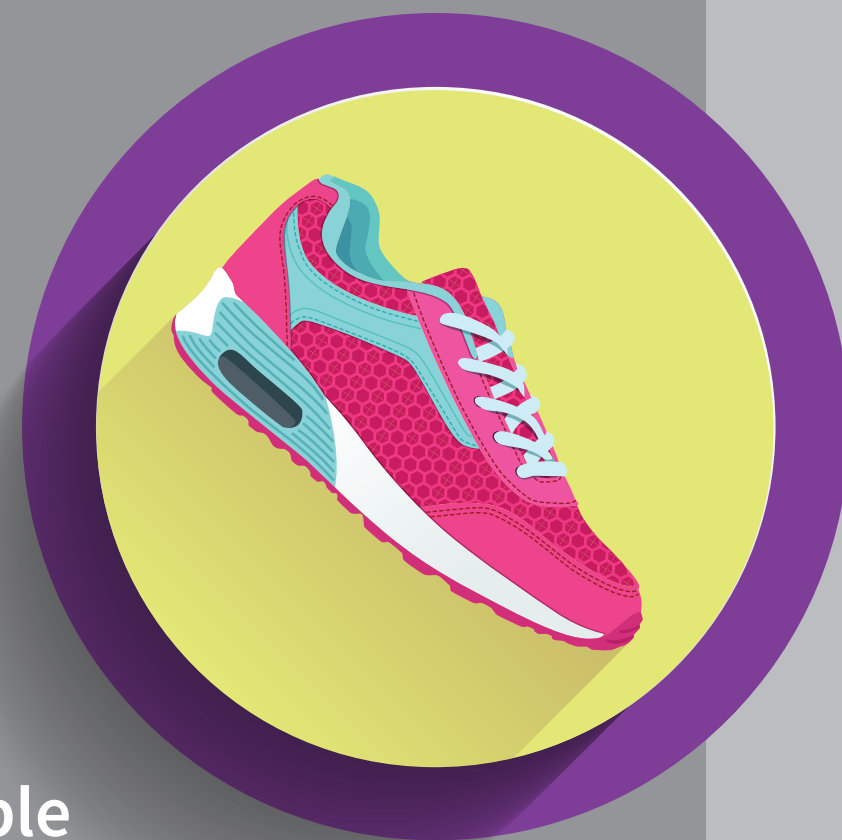

Increase revenue by **10%**

Case Study

A global footwear manufacturer produces **200,000 SKUs** every season.

Aging IT infrastructure, multiple systems, and a reactive product team were inhibiting agility and contributing to demand shortfalls.

Solution:

A cloud-based global supply chain solution focusing on sourcing and production collaboration.

Results:

- \$1m+** saved annually.
- 70%** cut in third-party scheduling delays.
- 20%** growth in customer fill rates.
- ROI payback was realized < 1 Year.**
